Subject: Expression of Interest – Junior Flutter Developer (Future Opportunities)

Dear Hiring Team,

I hope this message finds you well. I am reaching out to express my strong interest in future opportunities as a Junior Flutter Developer. While I understand there may not be an immediate opening, I am impressed by innovative companies in the mobile app development space, and I would be honored to be considered when a suitable position becomes available.

I am a Computer Engineering graduate from Nepal Engineering College, currently working as a Flutter Developer Intern at MindRisers Institute of Technology. Through my internship and academic projects, I have developed comprehensive hands-on experience in building production-ready mobile applications. My technical expertise includes:

• **Architecture & Best Practices:** Building scalable applications using Clean Architecture and MVVM design patterns

• **State Management:** Expertise in Riverpod for efficient, testable state handling

• **Backend Integration:** REST API integration and comprehensive Firebase services (Authentication, Firestore, Cloud Storage)

• **UI/UX Excellence:** Converting Figma designs into pixel-perfect, responsive Flutter interfaces

• **Localization:** Implementing multi-language support (English & Nepali) for diverse user bases

• **Data Persistence:** Offline storage solutions using Hive for enhanced user experience

• **Code Quality:** Performance optimization, clean code practices, Git/GitHub version control, and collaborative development

My project portfolio demonstrates my ability to deliver complete, functional applications. Notable projects include:

• **Totto (Buy & Sell Marketplace):** A full-featured community marketplace with real-time chat, price negotiation, Phone OTP and Google Sign-In authentication, and multilingual support. Built with Flutter, Firebase, REST APIs, Riverpod, and Python Django backend. Available on Google Play Store.

• LeafCare (ML + E-commerce): Integrated CNN-based plant disease detection using TensorFlow Lite with an e-commerce platform, allowing users to identify plant diseases and purchase relevant products.

• HomeLink (Property Listing Platform): A comprehensive property rental and sales platform with advanced filtering, user authentication, and property management features using the MERN stack.

• Multiple E-commerce & Recipe Applications: Built various apps showcasing Firebase integration, authentication, favorites, cart functionality, and data management.

What drives me is the opportunity to contribute to meaningful projects that make a real impact on users' lives. I am deeply motivated to work in environments that value clean code, collaboration, continuous improvement, and innovation. I believe in user-centric development and take pride in writing maintainable, well-documented code that stands the test of time.

I am actively seeking a role where I can apply my current skills while expanding my expertise in Flutter and mobile development. I am eager to learn from experienced professionals, contribute to challenging projects, and grow alongside a team that values technical excellence and innovation. Should your team have plans to expand or require a Flutter developer in the future, I would be grateful for the opportunity to discuss how I can add value to your organization.

I would be happy to share my portfolio projects in detail, participate in a technical discussion, or meet at your convenience. Please feel free to keep my information on file for future reference, and don't hesitate to reach out if you'd like to learn more about my experience.

Thank you very much for your time and consideration. I look forward to the possibility of contributing to your team in the future.

Best regards,

Pashupati Chaudhary

Junior Flutter Developer
